

COLOR FRUITS 1

Do you know fruit names? Do you know what color the fruits have? Yes? Then color the fruits with the right colors. Some fruits may have different colors. In that case, choose the color you like. Connect fruits of the same color with a line. If you want to have it more difficult, color the fruits so that pairs of fruits of the same color are created. But beware! An orange will never be purple. So don't make things up!
